

# PARADIDACT®

## The rolling classroom

PARAT introduces a new Mac-look PARADIDACT® mobile IT lab for schools and universities that use Apple MacBooks.

PARADIDACT Printer and projector storage

Dock, charge and manage software

## PARADIDACT®-Benefits Overview

- Lightweight transport solution for Apple MacBooks and peripherals such as a printer or projector
- Centralized power management
- Integrated original MagSafe power adapters automatically charge all MacBooks
- Built-in AirPort Extreme wireless access point
- Integrated network cabling and switch enable remote updates of docked laptops via Wake-On-LAN over a secure network connection. Cart models accommodate from 12 – 32 MacBooks (13" MacBook or 12" iBook)
- Exterior construction of white aluminum and synthetic materials for a Mac look
- Multimedia presentations made easy with on-board stereo system
- External network connection
- Large, easily accessible storage areas
- Central locking mechanism safely secures all equipment

## An entire IT classroom becomes mobile

The PARADIDACT® enables schools, universities and professional training centers to flexibly and securely deploy IT equipment. A compact form factor, solid rubber tires and ergonomic push handles allow the system to glide effortlessly from room to room.

## PARASYNC for iPod

Simultaneously charge and synchronize content to 15 or 30 iPods! Charging and managing large quantities of iPod devices is easier and quicker than ever with this durable, attractive and lightweight table-top solution.

## PARASYNC Language Lab Case

An entire language lab fits in this case allowing instruction to take place in any room. The case encloses a MacBook, a PARASYNC for 15 iPods, 15 headsets and microphones as well as an iPod audio recorder and cables. Just by removing the case's lid you can manage and charge all integrated devices anywhere.

## 20-iPod Transport Case

The top-loading case safely transports and securely stows 20 iPod players and accommodates one MacBook (or similar laptop up to 17") with ample storage pouches for power supplies and headsets. Constructed of impact resistant ABS plastic with a solid aluminum frame and locking latches, it also features a built-in telescoping trolley making it easy to roll between locations.

## Podcast Case

The Podcast case is the ultimate mobile solution for modern multimedia productions. The case accommodates a MacBook, digital camera, DVD camcorder, iPod and all of their associated connection cables. Recorded media can be transferred to and immediately edited with the enclosed MacBook without removing equipment from the case.

## Training Case

Conveniently take your IT equipment on the road with this ultra-mobile transport system. It's the ideal solution for on-site training. The dustproof case on wheels accommodates 6 MacBooks, power supplies, accessories and an AirPort Extreme access point. Simply use one wall outlet to charge all equipment. This clean, compact solution is always ready to go.
