

PARASYNC®

Charge & Synchronization Dock for iPod

- MOBILE
- LIGHT WEIGHT
- EASY TO USE

Simultaneously charge and synchronize content to 20 iPod devices from one iTunes library. With this durable, attractive and lightweight docking solution managing large quantities of iPod devices has never been easier.

Accommodates iPod classic, iPod touch and iPod nano. (Please specify model when ordering).

PARASYNC®: Another “smart product for mobile computing” by PARAT Solutions.

How it Works:

Connect the dock via USB to your MacBook. Open iTunes. All docked devices will appear (they must first be registered to the iTunes library).

Drag and drop content from the iTunes library onto the devices to sync them. It's that easy!

PARAT®
Solutions

“Made for iPod” means that an electronic accessory has been designed to connect specifically to iPod and has been certified by the developer to meet Apple performance standards. “Works with iPhone” means that an electronic accessory has been designed to connect specifically to iPhone and has been certified by the developer to meet Apple performance standards.

PARASYNC®

Features and Benefits

STRUCTURAL

Optimal support for the iPod devices

Cables are eliminated! Simply insert iPod in a slot to charge and sync. A proprietary two-layer support insert protects iPod players and keeps pin connectors from wiggling loose over time by perfectly guiding iPod onto the pin when docking. Please specify your iPod model when ordering.

SPECIFICATIONS:

PARASYNC

Dimensions: 12 3/4" x 10 1/2" x 2"
32 x 27 x 5cm
Weight: 6.5 lbs, 2,948g

Power Supply

Input: 100-240V~47-63MHz 1.9A
Output: 5.4V, 13A DC 65W max

ERGONOMICS/AESTHETICS

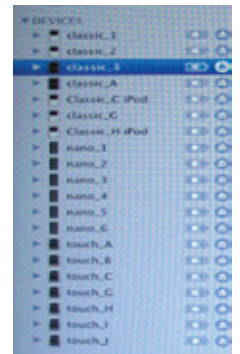

Compact, lightweight, attractive and versatile
PARASYNC's clean design is attractive in any setting. With dimensions similar to the length and width of a sheet of paper its compact footprint fits almost anywhere. Use it as a table-top station, in a transport cart or stow it discretely in a cabinet or drawer for safekeeping.

EASE OF USE

No third party management software required!

Connect PARASYNC to your MacBook and open iTunes. You'll see the 20 docked devices appear which you then register to your library. To synchronize the iPod players, simply drag and drop content to the devices as one normally would in iTunes. It's that simple.

The process described is best done with an Apple computer. PC users will experience fluctuations in performance when syncing to a large quantity of devices due to limitations in the PC's USB interface.

HANDY INDICATOR LIGHT

Shows charge and sync modes

A green indicator light shows when PARASYNC is charging (light is illuminated) and when it is in Sync Mode (light blinks). A UL-approved power supply charges all devices simultaneously. The supplied USB cable connects the dock to the host computer to sync iTunes content.
